Contents

No. 1 (February 1994)

PAGE

Measurement of teatcup liner wall movement. M. C. Butler and N. J. D. Adley 1

Characteristics of α-aminoisobutyric acid transport by lactating rat mammary gland. D. B. Shennan and S. A. McNeillie 9

Milk whey proteins in plasma of sows: variation with physiological state. S. C. Dodd, I. A. Forsyth, H. L. Buttle, M. I. Gurr and R. R. Dils . . . 21

Hormonal induction of α-lactalbumin and β-lactoglobulin in cultured mammary explants from pregnant pigs. S. C. Dodd, I. A. Forsyth, H. L. Buttle, M. I. Gurr and R. R. Dils 35

Distribution and density of α- and β-adrenergic receptor binding sites in the bovine mammary gland. H. M. Hammon, R. M. Bruckmaier, U. E. Honegger and J. W. Blum 47

Heavy coagulum formation in lactic casein manufacture: solids content, pH and gel strength variations through setting lactic coagulum. M. G. Weeks, E. J. Gosling and P. A. Munro 59

Changes in the gelation mechanism of whey protein concentrate with pH and temperature. S. M. Taylor, L. F. Gladden and P. J. Fryer . . . 71

Arsenic content of Spanish cows' milk determined by dry ashing hydride generation atomic absorption spectrometry. M. L. Cervera, J. C. Lopez and R. Montoro 83

Rapid, sensitive two-site ELISA for detection of cows' milk in goats' or ewes' milk using monoclonal antibodies. D. Levieux and A. Venien . . . 91

Detection of residual chymosin in cheese by an enzyme-linked immunosorbent assay. N. Boudjellab, O. Rolet-Repecaud and J.-C. Collin . . . 101

Identification of the unsaturated oxo fatty acids in cheese. E. Y. Brechany and W. W. Christie 111

Effect of milk protein standardization, by ultrafiltration, on the manufacture, composition and maturation of Cheddar cheese. T. P. Guinee, P. D. Pudja and E. O. Mulholland 117

Effect of freezing and frozen storage on the physicochemical, organoleptic and microbiological characteristics of a semi-hard ewes' milk cheese. J. Fontecha, C. Peláez, M. Juárez and M. C. Martín-Hernández. . . . 133

Evaluation of khoa as a milk solids source in ice cream. Shakeel-ur-Rehman, K. G. Upadhyay and A. J. Pandya 143

Short communication

Mineral composition as a characteristic for the identification of animal origin of raw milk. F. Rincón, R. Moreno, G. Zurera and M. Amaro . . . 151

Review article

Regulation of water and solute transport across mammalian plasma cell membranes by prolactin. D. B. SHENNAN 155

No. 2 (May 1994)

Milk accumulation and distribution in the bovine udder during the interval between milkings. C. H. KNIGHT, D. HIRST and R. J. DEWHURST. . . . 167

Effect of the levels of N fertilizer, grass and supplementary feeds on nitrogen composition and renneting properties of milk from cows at pasture. J. E. HERMANSEN, S. OSTERSEN and O. AAES 179

Triacylglycerol fatty acid composition of milk from periparturient cows during acute *Escherichia coli* mastitis. A.-M. MASSART-LEËN, C. BURVENICH and D. L. MASSART 191

Some aspects of measuring the size and rate of dispersion of milk powder agglomerates using the Malvern Particle Sizer 2600c. X. D. CHEN and R. J. LLOYD 201

Modification of β-lactoglobulin by aliphatic aldehydes in aqueous solution. H. STAPELFELDT and L. H. SKIBSTED 209

Thermal gelation and denaturation of bovine β-lactoglobulins A and B. M. MCSWINEY, H. SINGH, O. CAMPANELLA and L. K. CREAMER . . . 221

Retinol determination in milk by HPLC and fluorescence detection. S. K. JENSEN 233

Production of volatile compounds in model milk and cheese media by eight strains of *Geotrichum candidum* Link. N. JOLLIVET, J. CHATAUD, Y. VAYSSIER, M. BENSOUSSAN and J.-M. BELIN 241

Autolysis and proteolysis of different strains of starter bacteria during Cheddar cheese ripening. M. G. WILKINSON, T. P. GUINEE, D. M. O'CALLAGHAN and P. F. FOX. 249

Thermal inactivation of γ-glutamyltranspeptidase and *Enterococcus faecium* in milk-based systems. S. S. PATEL and R. A. WILBEY 263

Phagocytic activity of bovine polymorphonuclear neutrophil leucocytes. A. ZECCONI, V. BRONZO, R. PICCININI. G. SPREAFICO and G. RUFFO . . . 271

Changes in free fatty acids during the ripening of Idiazabal cheese: influence of brining time and smoking. A. I. NÁJERA, L. J. R. BARRON and Y. BARCINA . 281

Methods for the determination of aroma compounds in dairy products: a comparative study. V. XANTHOPOULOS, D. PICQUE, N. BASSIT, C.-Y. BOQUIEN and G. CORRIEU 289

Short communications

Sensory and rheological properties of low-fat filled 'pasta filata' cheese. E. PAGLIARINI and N. BEATRICE 299

Effects of UHT heating of milk in an experimental plant on several indicators of heat treatment. M. M. HEWEDY, C. KIESNER, K. MEISSNER, J. HARTKOPF and H. F. ERBERSDOBLER 305

Effect of sodium dodecylsulphate on the binding of *Lactococcus lactis* subsp. *lactis* T-80 cells with Trp-P1. T. TANABE, K. SUYUMA and A. HOSONO . . 311

No. 3 (August 1994)

Effects on milk yield, somatic cell count and milk conductivity of short-term non-milking of lactating quarters of cows. J. HAMMAN and P. GYODI . . 317

Continuously elevated concentrations of oxytocin during milking are necessary for complete milk removal in dairy cows. R. M. BRUCKMAIER, D. SCHAMS and J. W. BLUM 323

High affinity ($Na^+ + Cl^-$)-dependent taurine transport by lactating mammary tissue. D. B. SHENNAN and S. A. MCNEILLIE 335

Intramammary pressure and luteal oxytocin after PGF2α administration in cycling and early pregnant ewes. P.-G. MARNET and J. LABUSSIÈRE . . 345

Optimizing clarified whey ultrafiltration: influence of pH. G. DAUFIN, J.-P. LABBE, A. QUEMERAIS, F. MICHEL and U. MERIN 355

Characterization of the oligopeptides of Parmigiano-Reggiano cheese soluble in 120 g trichloroacetic acid/l. F. ADDEO, L. CHIANESE, R. SACCHI, S. S. MUSSO, P. FERRANTI and A. MALORNI 365

Effect of heat treatments on the incorporation of milk serum proteins into the fat globule membrane of homogenized milk. S. K. SHARMA and D. G. DALGLEISH 375

Detection of powerful odorants in heated milk by use of extract dilution sniffing analysis. L. MOIO, P. ETIEVANT, D. LANGLOIS, J. DEKIMPE and F. ADDEO . 385

Detection of proteolysis in raw milk stored at low temperature by an inhibition ELISA. C. PICARD, I. PLARD, D. RONGDAUX-GAIDA and J.-C. COLLIN . . 395

Simple empirical and fundamental methods to determine objectively the stretchability of Mozzarella cheese. C. APOSTOLOPOULOS 405

Short communications

Evaluation of the inclusion of estimators of body composition in models for the prediction of milk production by dairy cows. A. J. ROOK, M. J. GIBB, W. E. IVINGS, K. ASTON and J. D. SUTTON 415

Thermal sensitivity of mares' milk proteins. F. BONOMI, S. IAMETTI, E. PAGLIARINI and G. SOLAROLI 419

Inorganic constituents of milk. V. Ion activity product for calcium phosphate in diffusates prepared from goats' milk. C. HOLT, I. H. L. ORMROD and P. C. THOMAS 423

Effect of trypsin on bovine lactoferrin and interaction between the fragments under different conditions. L. MATA, H. CASTILLO, L. SÁNCHEZ, P. PUYOL and M. CALVO 427

Important differences between the generation times of *Listeria monocytogenes* and *List. innocua* in two *Listeria* enrichment broths. F. MACDONALD and A. D. SUTHERLAND 443

Measurement of proteolysis in cheese: relationship between phosphotungstic acid-soluble N fraction by Kjeldahl and 2,4,6-trinitrobenzenesulphonic acid-reactive groups in water-soluble N. Y. BOUTON and R. GRAPPIN . . 437

No. 4 (November 1994)

Once daily milking of dairy cows: relationship between yield loss and cisternal milk storage. C. H. KNIGHT and R. J. DEWHURST 441

Effect of milking interval on secretion rate and composition of camel milk in late lactation. M. A. ALSHAIKH and M. S. SALAH 451

Machine milking of dairy goats during lactation: udder anatomy, milking characteristics, and blood concentrations of oxytocin and prolactin. R. M. BRUCKMAIER, C. RITTER, D. SCHAMS and J. W. BLUM 457

Evaluation of the use of an artificial teat to measure the forces applied by a milking machine teatcup liner. N. J. D. ADLEY and M. C. BUTLER . . 467

Rennet coagulation of milk in the presence of sucrose. M.-H. FAMELART . . 473

Disulphide arrangement in bovine caseins: localization of intrachain disulphide bridges in monomers of κ- and α_{s2}-casein from bovine milk. L. K. RASMUSSEN, P. HØJRUP and T. E. PETERSEN 485

Secondary structures in β-casein peptide 1–42: a two dimensional nuclear magnetic resonance study. N. M. WAHLGREN, P. DEJMEK and T. DRAKENBERG 495

Heat stability of homogenized milk: role of interfacial protein. C. H. MCCRAE, D. HIRST, A. J. R. LAW and D. D. MUIR 507

Quantitation of *trans* fatty acids in milk fat using spectroscopic and chromatographic methods. F. ULBERTH and M. HENNINGER 517

Identification of *Bacillus* strains isolated from milk and cream with classical and nucleic acid hybridization methods. R. TATZEL, W. LUDWIG, K. H. SCHLEIFER and P. R. WALLNÖFER 529

Response to phage infection of immobilized lactococci during continuous acidification and inoculation of skim milk. F. M. L. PASSOS, T. R. KLAENHAMMER and H. E. SWAISGOOD 537

Inhibitory effect of dairy products on the mutagenicities of chemicals and dietary mutagens. P. CASSAND, H. ABDELALI, C. BOULEY, G. DENARIAZ and J. F. NARBONNE 545

Effect of yogurt feeding on the small and large intestine associated lymphoid cells in mice. G. PERIDGÓN, M. RACHID, M. V. DE BUDEGUER and J. C. VALDEZ 553

Short communications

Comparative study of the iron-binding strengths of equine, bovine and human lactoferrins. K.-I. SHIMAZAKI, K. OOTA, K. NITTA and Y. KE . . . 563

Influence of lα-hydroxycholecalciferol on calcium and phosphorus concentration in camel milk. F. RIAD, M. BEN GOUMI, M.-J. DAVICCO, SAFWATE and J.-P. BARLET 567

Chromatographic profiling of aminopeptidolytic activities in lactobacilli as a tool for strain identification. Y. ARDÖ and L. JÖNSSON 573

Effect of crude extract of *Lactobacillus* in increasing the amino N and acetaldehyde levels in yogurt. L. GROZEVA, B. TCHORBANOV and B. GYOSHEVA 581

Partial identification of peptides from the water-insoluble fraction of cheddar cheese. L. H. MCSWEENEY, S. POCHET, P. F. FOX and Á. HEALY . . . 587
